Andrea Taverniti

SOFTWARE ENGINEER | FULL-STACK | CLOUD | IoT | R&D;

Monasterace (RC), Italy · tavernitiandrea@gmail.com · linkedin.com/in/andrea-taverniti-8403a51bb · github.com/andreataverniti-dev

PROFILE

Software Engineer with a degree in Computer Engineering and end-to-end experience across full-stack products, cloud and IoT. R&D; experience on European projects spanning technical analysis, architecture, development, hardware/software integration, documentation and coordination. I also independently build platforms used by real users, with strong ownership and problem-solving skills.

PROFESSIONAL EXPERIENCE

Analyst / Software Developer · TEA S.R.L. — Jul 2025 - Aug 2026

• Technical analysis, architecture and full-stack development for research and innovation projects; evolutionary maintenance and bug fixing.
• IoT integration with ESP32, sensors, relays and actuators; assembly, debugging and testing.
• Technical reports, presentations and EU-project deliverables; coordination with university and hardware partners.

Freelance Software Developer — 2019 - Present

Flutter/Firebase products, websites and web apps; 80+ FiveM systems for 100+ communities/servers using Lua, React and MySQL (300k+ records).

SELECTED PROJECTS

SNALS Digital Desk — Flutter, Dart, Firebase, Node.js, Firestore, Cloud Functions
Independently built cross-platform product: appointments, cases, document workflows, real-time chat, QR, notifications, reports and Google Calendar/Meet.

AIVES — React, Python, ESP32, IoT
Management tool for accessible multisensory experiences and project-file generation; maintenance and software/sensor/actuator integration.

MITICA — ESP32, sensors, relays
IoT demonstrator: control logic, assembly, debugging and testing.

GAIA — Software Design, Documentation, R&D;
Application skeleton, technical report, presentations and deliverables for a European project on accessible multisensory games.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Dart, Python, Lua, Java, C#, C++, SQL
Frontend: React, Flutter, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend/Cloud: Node.js, REST API, Firebase, Cloud Functions, Firestore, Auth, Storage, FCM
Data/Tools: MySQL, PostgreSQL, MariaDB, SQLite, MongoDB, Git, GitHub, Docker, VS Code
IoT: ESP32, Arduino, sensors, relays, actuators, hardware/software integration

EDUCATION & LANGUAGES

Degree Programme in Computer Engineering · University of Calabria (Unical) · **Degree awarded 14 October 2026**
Scientific High School Diploma · Liceo Scientifico Pietro Mazzone
Italian: native · English: B1/B2
